

Experienced **expert**

Delva is your experienced expert and partner in industrial 3D metal printing. We offer co-development that digs deeper than the surface to find optimal solutions to the customer's individual needs. 3D printing of metals adds a new dimension to the range of manufacturing technologies and enables completely new types of structures and solutions. Embrace this mature technology with Delva and improve your competitiveness.

Delva as a **partner**

EFFICIENT ADDITIVE MANUFACTURING CHAIN

Profound **technical** expertise

With the broadest metal printing material portfolio in Finland, technical expertise, and insight into the possibilities, we can significantly maximise the benefits of industrial printing in your organisation.

Application advantages

Nozzles, and other similar structures

Results produced
by printing
delva.fi

Technical excellence and innovation utilising the freedom of shape:

- ▶ Enhanced flow of air, gases, or fluids and improves mixing of substances
- ▶ Increased process efficiency e.g., through reduced pressure losses
- ▶ Improved heat transfer and enhanced cooling

Shortening supply chain and reducing bounded capital:

- ▶ Reduced amount of components
- ▶ Simplified and reduced need for assembly
- ▶ Shortened supply chain, less storage, logistics, and risks

Increasing competitiveness with sustainable solutions:

- ▶ Enabling new features, reducing weight and size with better performing materials
- ▶ Increasing service life with durable materials and repairability
- ▶ Cost-efficiency through the whole life cycle

**As a part of the customers evolving value chain,
we improve our customers competitiveness with AM solutions.**
