

Experienced **expert**

Delva is your experienced expert and partner in industrial 3D metal printing. We offer co-development that digs deeper than the surface to find optimal solutions to the customer's individual needs. 3D printing of metals adds a new dimension to the range of manufacturing technologies and enables completely new types of structures and solutions. Embrace this mature technology with Delva and improve your competitiveness.

Delva as a **partner**

EFFICIENT ADDITIVE MANUFACTURING CHAIN

Profound **technical** expertise

With the broadest metal printing material portfolio in Finland, technical expertise, and insight into the possibilities, we can significantly maximise the benefits of industrial printing in your organisation.

Application **advantages**

3D printing boosts automation solutions and robotics

Results produced
by printing
delva.fi

Technical excellence and innovation utilising the freedom of shape:

- ▶ Customise parts to fit a specific task or customer requirement
- ▶ Enable lighter components by streamlined designs and hollow structures
- ▶ Take advantage of bionic structures and seamless, moving conjunctions of components

Shortening and simplifying supply chain:

- ▶ Short lead times, less storage, logistics, and risks
- ▶ A lower number of components; simplified and reduced need for assembly
- ▶ Rapid testing of different shapes is a strategic advantage

Increasing competitiveness with sustainable solutions:

- ▶ Enabling new features, reducing weight and size with better performing materials
- ▶ Increasing service life with durable materials and repairability
- ▶ Lowering the cost of one-off jobs and small series

**As a part of the customers evolving value chain,
we improve our customers competitiveness with AM solutions.**
